ABSTRACT

The goal of this project is to make a privilege based social media platform, a question-and-answer forum where questions are asked and answered by the users. The platform will allow its users the ability to ask and answer questions and to vote questions and answers up or down. Users have the ability to edit their questions and answers as well. The platform will also have a reward system where the users will receive rewards based on the popularity of the questions or answers they have posted. More rewards the user receives, higher will be his/her reputation. A higher reputation lets users unlock new privileges like the ability to vote, comment and edit other people's questions or answers.

ACKNOWLEDGEMENT

It is my pleasure to express with deep sense of gratitude to Prof. Dr.PRABHU J Associate Professor Grade 2, School of Information Technology and Engineering, Vellore Institute of Technology for his/her constant guidance, continual encouragement, understanding; more than all, he taught me patience in my endeavour. My association with him / her is not confined to academics only, but it is a great opportunity on my part of work with an intellectual and expert in the field of Object-Oriented Analysis And Design.

I would like to express my gratitude to Dr. G Viswanathan, Dr. Sankar Viswanathan, Dr. Rambabu Kodali, Dr. S. Narayanan, Dr. B.K. Tripathy and the Professor of School of Information Technology and Engineering for providing with an environment to work in and for his inspiration during the tenure of the course.

In jubilant mood I express ingeniously my whole-hearted thanks to all teaching staff and members working as limbs of our university for their not-self-centred enthusiasm coupled with timely encouragements showered on me with zeal, which prompted the acquirement of the requisite knowledge to finalize my course study successfully. I would like to thank my parents for their support.

It is indeed a pleasure to thank my friends who persuaded and encouraged me to take up and complete this task. At last, but not least, I express my gratitude and appreciation to all those who have helped me directly or indirectly toward the successful completion of this project.
